

order-book/limit-order-no-match

Additional Statistics:

	Lower bound	Estimate	Upper bound
Slope	106.27 ns	121.59 ns	137.77 ns
Throughput	7.2584 Melem/s	8.2244 Melem/s	9.4102 Melem/s
R ²	0.1347024	0.1451209	0.1335953
Mean	98.524 ns	104.70 ns	111.86 ns
Std. Dev.	20.669 ns	34.425 ns	45.590 ns
Median	93.842 ns	95.080 ns	96.846 ns
MAD	5.6243 ns	7.2935 ns	10.823 ns

Additional Plots:

- Typical
- Mean
- Std. Dev.
- Median
- MAD
- Slope

Understanding this report:

The plot on the left displays the average time per iteration for this benchmark. The shaded region shows the estimated probability of an iteration taking a certain amount of time, while the line shows the mean. Click on the plot for a larger view showing the outliers.

The plot on the right shows the linear regression calculated from the measurements. Each point represents a sample, though here it shows the total time for the sample rather than time per iteration. The line is the line of best fit for these measurements.

See [the documentation](#) for more details on the additional statistics.

Change Since Previous Benchmark

Additional Statistics:

Additional Plots:

- Change in mean
- Change in median

	Lower bound	Estimate	Upper bound	
Change in time	+2.2112%	+9.2468%	+16.493%	(p = 0.01 < 0.05)
Change in throughput	-2.1633%	-8.4641%	-14.158%	
Performance has regressed.				

- [T-Test](#)

Understanding this report:

The plot on the left shows the probability of the function taking a certain amount of time. The red curve represents the saved measurements from the last time this benchmark was run, while the blue curve shows the measurements from this run. The lines represent the mean time per iteration. Click on the plot for a larger view.

The plot on the right shows the two regressions. Again, the red line represents the previous measurement while the blue line shows the current measurement.

See [the documentation](#) for more details on the additional statistics.

This report was generated by [Criterion.rs](#), a statistics-driven benchmarking library in Rust.
